-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The replacement sheets of Figs. 11A and 11B have been accepted.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 24 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does *not* disclose a liquid crystal display comprising a common electrode having a plurality of *X-shaped openings*. In addition, the specification does *not* disclose a liquid crystal display comprising a pixel electrode (formed on the first substrate) having a plurality of traverse openings, a plurality of projected portions on the second substrate and a common electrode having a plurality of X-shaped openings. It is noted that page 8, lines 12-17 of the specification discloses: "In the above embodiments, *both* the projections and the openings are provided on the *TFT array panel*. However, the *projections* may be provided on a *color filter panel* opposite to the TFT array panel, and the *openings alone* may be provided on the *TFT array panel*. Furthermore, the *openings alone* may be provided on *both* the panels. In this case, the planer shapes of the projections or the openings may be the same as those of the first to the fourth embodiments".

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 23 (line 8) and 24 (line 9), it is unclear a shape of each portion of which element divided by the traverse openings is substantially a curved rectangle or circular in plane view.

Claims 20 and 21 are allowed for the same reasons set forth in the last Office action.

Claim 23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claim 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraphs, set forth in this Office action.

Claims 23 and 24 are also allowed over the prior art because they recite similar features as those allowed features of claims 20 and 21.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takatori et al disclose pixel electrodes having a plurality of openings, and a shape of each portion of the pixel electrode divided by the opening is not curved.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
